I am conducting a study about Grey Nomads and any issues they may have concerning their health or social needs while they are travelling. I would like to talk to you, as a member of this group, about this topic and your experiences.

The purpose of the study is to examine the Grey Nomads group and their health and social status as they travel around Australia. This includes any health or social and community concerns whilst travelling the Australian continent and, any issues or problems with access to health, social and community facilities while travelling.

The interviews will focus on your ideas and experiences connected to your specific health, social and community needs while travelling Australia, and specifically while holidaying in Central Queensland. The interviews should take between forty-five and sixty minutes. If, for any reason, during the course of the interview you wish to cease your participation in the interview you are free to do so. Also, a requirement of conducting research as a member of a university is that the researcher must guarantee anonymity. All identifying data will be removed from reports.

If you have any other queries please do not hesitate to bring them to my attention. Thank you for your participation.
