

# Why do objects float and sink?

## Handout – Approach One

When your group have completed the activity, you will need to explain what you have done and why. Use the following questions as a guide to assist you:

- What did you change on your object?
- How did you modify your object?
- How did the modification cause the desired outcome?
- If you did not get the desired outcome, why? What could have been done to achieve the desired outcome?
