Theme 4: Policy, Economics & Implementation

POLICYMAKER INVOLVEMENT - BRASIL

Bhagteshwar Singh
University of Liverpool
NIHR Global Health Research Group on Brain Infections
BIGlobal Group Meeting | 17th January 2020 | Mangochi, Malawi
Contents

• Likely impediments to the study/intervention
• Existing fora & lines of communication
• Key people to contact
• Whom contacted, when, and feedback
• Plan for involvement in intervention
• Plan for wider dissemination
Recap: Draft Intervention Domains & Components

HUMAN RESOURCES
- Clinical training
- Lab training
- HR management

ACCESS & PROCUREMENT
- Diagnostic kits
- Consumables
- Equipment
- Medicines

PROCESSES
- Clinical algorithms
- Lab algorithms
- Lumbar puncture pack
- Logistics

Each component tailored to hospitals’ needs & capacity
Likely impediments to the study/intervention

Study:
• Ethics approvals
• Other local regulatory approvals

Intervention (in addition to systems change being difficult!):
• Resource constraints
• Insights and buy-in from:
  • Local (department & hospital) decision makers
  • Higher-level (district, state & national) policy makers
• Public health system is very hierarchical, which can be difficult to navigate; involving state health department is important for change
• Doctors are driven by motivations for income: private practice
• Northeast Brasil is poor, and activities there are seen as lower priority
Existing fora & lines of communication

Previous work/agreements with relevant policymakers:
• Zika-related research involved regular meetings with national and international policymakers (including WHO & UN)
• Rafael helped with national arbovirus guidelines

Current working groups/ongoing projects with policymakers:
• Zika-related project with WHO
• Rafael also has WHO project
## Whom contacted, when, and feedback

Key people to contact - pending

- Luisa Macedo (Secretary for Hospital Services, Pernambuco State Health Department): could be helpful later
Domains/components of the intervention to prioritise for policymaker involvement

**HUMAN RESOURCES**
- HR management

**ACCESS & PROCUREMENT**
- Diagnostic kits
- Consumables
- Equipment
- Medicines

**PROCESSES**
- Logistics
Plan for involvement in intervention

Key policymakers to involve in intervention development:
• Hospital directors
• Heads of department
• Secretary for Health Surveillance: keen to be involved throughout intervention development
Plan for wider dissemination

Mandatory dissemination requirements:
• CONEP (national ethics committee)

For policymakers not involved in developing the intervention:
• Plan yet to be made

Other policymakers:
• Yet to be identified
Questions/Discussion
