The COVID-19 pandemic, caused by SARS-CoV-2, is of a scale not seen since the 1918 influenza pandemic. Although the predominant clinical presentation is with respiratory disease, neurological manifestations are being recognised increasingly. In this webinar we will review what’s known about neurological manifestations of SARS CoV-2 and related coronaviruses, consider the disease mechanisms and outline a framework for future investigative studies.

Chair: Prof Tom Solomon
University of Liverpool, UK

Dr Laura Benjamin
University College London, UK

Prof Leonardo Pantoni
University of Milan, Italy

Dr Avindra Nath
National Institutes of Health, USA
