

The Global Health Network and Liverpool Brain Infections Group invites you to a webinar:

Neurological disorders associated with COVID-19: Guillain-Barré Syndrome Cases and Patients on Immunomodulators

The COVID-19 pandemic, caused by SARS-CoV-2, is of a scale not seen since the 1918 influenza pandemic. Although the predominant clinical presentation is with respiratory disease, neurological manifestations are being recognised increasingly. After a successful first webinar, we will now review the first few cases of Guillain-Barré syndrome (GBS) following SARS-CoV-2 infection and discuss the management of patients on immunomodulators during the COVID-19 pandemic.

Chair: Prof Tom Solomon

University of Liverpool, UK

Prof Bart C Jacobs

Erasmus MC, The Netherlands

Dr M Netravathi

Neurology at the National Institute of Mental Health and Neuro-Sciences, India

9 June 2020 12:00 (GMT+1)
