

The Global Health Network and Liverpool Brain Infections Group invite you to a seminar:

Neurological disorders associated with COVID-19: Neuropsychiatric and neurocognitive aspects in Australia and America

The COVID-19 pandemic, caused by SARS-CoV-2, is of a scale not seen since the 1918 influenza pandemic. Although the predominant clinical presentation is with respiratory disease, neurological manifestations are being recognised increasingly. In this episode, we will review neuropsychiatric manifestations of COVID-19, and hear some preliminary results on the impact of COVID-19 on neurocognition and olfaction.

Chair: Professor Tom Solomon

Chair of Neurological Science, University of Liverpool, Director of the National Institute for Health Research (NIHR) Health Protection Research Unit in Emerging and Zoonotic Infections

Dr James J. Sejvar

Centers for Disease Control and Prevention, United States of America
Neuropsychiatric manifestations of COVID-19

Dr Lucette Cysique & Prof Bruce J. Brew

St Vincent's Hospital Applied Medical Research Centre, Australia
"ADAPT" COVID-19 Study: A prospective, observational cohort study at St Vincent's Hospital
Sydney: preliminary neurocognitive and olfaction results

20 Aug 2020 🕒 13:00 PM (GMT+1)
