

The Global Health Network and Liverpool Brain Infections Group invite you to a seminar:

Neurological Associations of COVID-19: Study results from COPING and CoCo-Neuro

The COVID-19 pandemic, caused by SARS-CoV-2, is of a scale not seen since the 1918 influenza pandemic. Although the predominant clinical presentation is with respiratory disease, neurological manifestations are being recognised increasingly. In this episode, we will review complications of COVID-19 in patients with Alzheimer's disease, as well as get some more insights into what's known and unknown about Neurological Conditions in the Context of COVID-19.

Chair: Professor Tom Solomon

Chair of Neurological Science, University of Liverpool, Director of the National Institute for Health Research (NIHR) Health Protection Research Unit in Emerging and Zoonotic Infections

Neuropsychiatric manifestations in patients with Covid-19 : the Pitié-Salpêtrière experience

Dr Cécile Delorme, Pitié-Salpêtrière Hospital, France

TBC

Professor Gerome Breen, King's College London, UK

15 Oct 2020 🕒 1:00 PM (London)
