

The Global Health Network
invites you to
a virtual workshop:

PANDORA
Pan-African Network For Rapid Research, Response
and Preparedness for Infectious Diseases Epidemics

TESA TRIALS OF EXCELLENCE IN SOUTHERN AFRICA

ALERRT
African coalition for Epidemic Research, Response and Training

Research Ethics During Epidemics

During infectious disease outbreaks, and epidemics such as COVID-19, there is a moral imperative for ethically and scientifically rigorous clinical research. This workshop will inform participants about some of the ethical challenges in conducting this research. We will cover 5 broad topics through presentations and Q&A panel discussions: ethics of research in vulnerable populations, community and stakeholder engagement, informed consent in epidemic research, biobanking and ethics review during epidemics.

Live workshop

2&3 December 2020

08:00-12:00 (GMT)

Learn More at:
pandora.tghn.org

Objectives

- Understand the concept of vulnerability, and the measures the research community can take in protecting participants
- Appreciate the importance of community engagement in epidemic research and the supporting role of RECs.
- Be aware of issues surrounding voluntary informed consent in an emergency situation.
- Explore ethical challenges in conducting research involving biological samples/data sharing during an epidemic.
- Understand the complexities of ethical review associated with research conducted in epidemics.

Certificates of Attendance

Certificates of Attendance are available. Please refer to The Global Health Network's certificates policy for more information
