

**Webinar:**

*Experiences of nurses in navigating practical challenges during the COVID-19 pandemic – A webinar with nurses from four Asian countries*

**Monday 6 September 2021**

**London 10.00-12:00 | New Delhi 14:30-16:30 | Bangladesh 15:00-17:00 | Jakarta 16:00-18:00  
Malaysia/Singapore 17:00-19:00**

**Abstract:**

It has been almost two years since the outbreak of the SARS-COV-2 Viral pandemic. Needless to say, conducting research during epidemics is riddled with several coordination and implementation challenges, and several Asian institutions have rich experiences that we can glean and learn from.

To this effect, The Global Health Network in partnership with [Global Research Nurses](#) are organising a webinar, bringing together experts in the field from across Asia to share their experiences and unique challenges of conducting research during outbreaks and how they navigated them to deliver high quality research.

**Agenda:**
