First Line Antimicrobials in Children with Complicated Severe Acute Malnutrition Study Conclusion

**FLACSAM CONCLUSION**

To be completed after D90 follow up, following death of child, or withdrawal from study

Date of last vital status confirmed or date of death

- The date last seen in the community or in hospital
- The date lost vital status was confirmed by telephone/verbal report
- The date withdrawn
- The date of death

This date is based on:

- Direct observation
- Written report (death certificate/hospital records)
- Phone call/verbal report

Did the participant complete the study up to day 90? (Confirmed alive at day 90)

- YES
- NO

If the answer is NO, state the reason *(tick one)*:

- Untraceable (lost to follow up)
- Permanently moved outside study area and not contactable to establish vital status

**Died**

</table>

Has verbal autopsy been completed?

- YES
- NO

**Voluntary withdrawal with no further follow up**

Reason given in discussion (tick each mentioned; do not probe for each)

- Prefer not to say
- Insufficient benefit to participant
- Travel out of research area
- Others in household or community not happy to continue
- Blood sampling
- Time/disruption in follow-up visits
- Unable to arrange care for other children
- Unsure/unsupportive of reasons for research or of the institution conducting it

**Other**
