

## Leadership and development of Nursing Research Skills.

**Address:** Universidad Nacional de la Matanza – Florencio Varela 1903, San Justo, Buenos Aires

**Language:** Spanish

**Audience:** Nurses who work in the healthcare and nursing students

**Number of Participants:** 50 vacancies – free

**Registration:** <https://oxford.onlinesurveys.ac.uk/global-research-nurses-argentina-unlam-taller-de-inv>

Research is an unavoidable and inseparable function for Nursing. Providing knowledge and skills, specific and technical knowledge, in addition to cultivating life habits and attitudes that adhere to values will allow them to be reflected in attitudes and behaviors, conferring bioethical and moral responsibility, taking this knowledge to quality practices.

From the Bachelor's Degree in Nursing we want to strengthen the training and research leadership of Nurses, who are performing care tasks in the town of La Matanza to provide basic tools and generate a research network.

The general purpose of this workshop is to strengthen research training for nursing professionals who are performing care tasks in the town of La Matanza.
