

## IECS FIRST YEAR IN THE TGHN LAC COMMUNITY: A LOOK BACK AT 2024

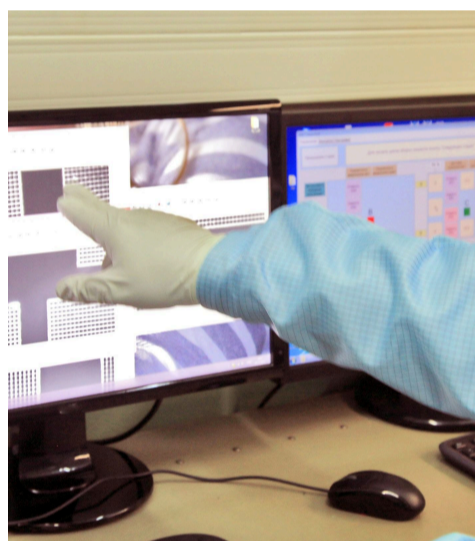

### Building The Global Health Network LAC Community

The Global Health Network celebrated the first year of its Latin America and the Caribbean (TGHN LAC) community, aiming to strengthen research capacity across the region. The Institute for Clinical and Health Effectiveness (IECS) is proud to be part of this important initiative.

Over the past year, IECS has actively contributed to this effort, leading various training and professional development initiatives while fostering knowledge exchange and collaboration among healthcare professionals in the region.

Explore the activities and resources available on the TGHN LAC Hub, designed to support ongoing learning and collective growth.

### Some highlighted activities of 2024:

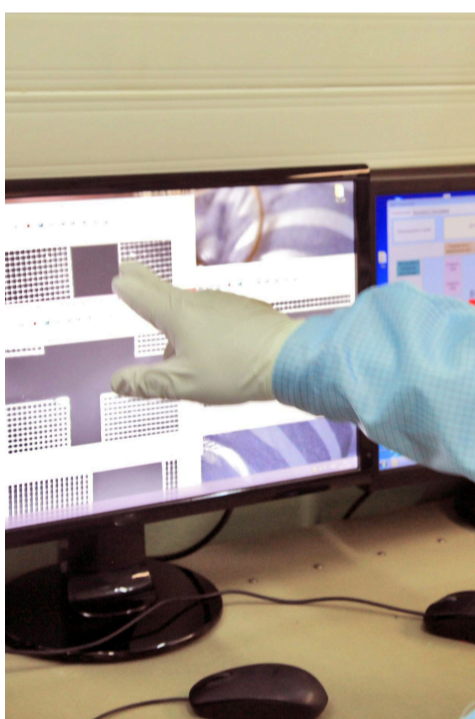

#### RESEARCH CLUBS

##### Critical Care Research Club

A collaborative space for healthcare professionals and experts from other disciplines to exchange ideas, ask questions, and seek collective answers on research-related topics. A great example is the Critical Care Research Club, the first of its kind in LAC.

#### SUPPORTED LEARNING SESSIONS

##### Training Programme on Clinical Management, Quality, and Patient Safety: A Guide for Current and Future Healthcare Leaders

A comprehensive learning programme on clinical management, quality, and patient safety, designed for professionals aspiring to leadership roles in healthcare. The programme featured interactive sessions with experts, multimedia resources, and assessments, focusing on managing clinical situations involving communicable diseases.
