Workshop: Introduction to Good Clinical Trials – Using the Good Clinical Trials Collaborative (GCTC) Guidance

November 25 & 26, 2024

Region: Latin America and the Caribbean – MÉXICO -

1. General Information

- **Workshop Title:** Introduction to Good Clinical Trials, using the Good Clinical Trials Collaborative (GCTC) Guidance
- **Dates:** November 25–26, 2024
- **Format:** In-person
- **Venue:**
Public Library of the State of Jalisco "Juan José Arreola", Periférico Norte Manuel Gómez Morín No. 1695, Col. Belenes, Zip Code 45100, Zapopan, Jalisco, Mexico
- **Fee:** No cost (requires prior registration)
- **Moderator:**

Netzahualpilli Delgado Figueroa
PRISM TGHN LAC Coordinator – The Global Health Network
Email: netzahualpilli.dfigueroa@academicos.udg.mx

- **Guest panelists:**

Daniela Morelli (TGHN LAC HUB)

Nurse and researcher with expertise in clinical effectiveness, committed to research capacity building and nursing empowerment across Latin America.

Bryain Maradiaga-Mendoza

Global health advocate and AI coordinator, experienced in research, clinical training, and international medical collaboration across the Americas.

Luis Felipe Arias Soto

Clinical psychologist focused on mental health, research ethics, digital health, and implementation science in low-resource Latin American settings.

Fernando Rubinstein

Physician and epidemiologist specializing in public health research, training, and clinical methods. Leads TGHN's global training initiatives and capacity-building efforts.

2. Participation

- **Total attendees:** 34 participants over the two-day workshop
- **Working language:** Spanish
 - Printed and digital materials were provided in Spanish
 - Presentations were fully translated during the sessions
 - Mixed format: in-person and remote collaboration

3. Workshop Objectives

- Provide fundamental knowledge on Good Clinical Practice in controlled trials
- Develop skills in ethical protocol design, particularly for vulnerable populations
- Train participants in quality management and effective monitoring of clinical trials
- Promote ethical and transparent communication of clinical trial results

4. Topics Covered

- Capacity-building and cooperation opportunities through TGHN
- Developing a strong clinical research question
- Ethical protocol design for vulnerable populations
- WHO 2024 Guidance for Best Practices in Clinical Trials
- Risk-proportionate trial design and conduct
- Strengthening the global clinical trials ecosystem
- Quality management and trial monitoring

5. Workshop Activities and Outcomes

Participatory Exercise: Identifying Barriers and Facilitators

Participants collaboratively identified **key barriers and facilitators** for the implementation of good clinical trials in Latin America and the Caribbean:

6. Dissemination and Follow-up

- Positive social media feedback from participants

- Event updates shared via:
 - Global Health Trials
 - [Latin America Hub – The Global Health Network](#)

7. Photo Gallery and Videos of the activities:

- Videos of the activities [Video1](#) and [Video2](#)
